## Congratulations on purchasing your emporia telephone!

This telephone has been developed in accordance with the standards of simplicity and is especially easy to handle. To help you become familiar with your new telephone quickly, we have put together the important information for you in this handy guidebook.

You'll find out all about making telephoning simple at [www.emporia.eu](http://www.emporia.eu)

I hope you enjoy using your telephone and remain  
Yours faithfully,

Eveline Pupeter  
CEO emporia Telecom

## **Delivery Contents**

- Included in the standard delivery are the telephone, a charging cable, a charging device, a battery, and this guidebook (instruction manual).
- Should any part be missing or defective, please contact the emporia Hotline on/at +43·732·777717·0

## **Tips about this manual**

- In this guidebook you'll find **helpful hints** and **tips** which are marked by this symbol .
- Some menu listings can be dialled directly using a **combination of numbers**. You'll find the most important combinations marked by the symbol .
- **Warnings** are marked by the symbol .

 *Depending on the software version or the network operator, some of the contents of this instruction manual may be different from your telephone.*

# 1 FOR YOUR SAFETY

Please read all of the safety guidelines in this guidebook carefully and follow them. Not following them may be dangerous or illegal.

-  Do not use this device while driving.
-  When using this device, keep it 15 mm from your body.
-  Keep the device 20 cm from a pacemaker and other medical devices.
-  When in a hospital or medical facilities, turn off the device when so instructed.
-  When on a plane or at an airport, turn off the device when so instructed.
-  Do not use the phone in an area where blasting is occurring.
-  Do not use the phone at a petrol/refuelling station.
-  Do not shine the torch directly into a person's or animal's eyes.

## 2 FIRST STEPS

### 2.1 Installing your SIM-card and battery

#### This is how to install your SIM-card

As shown in the drawing, slide off the back cover in the direction of the arrow.

The SIM-card slot is located in the upper right-hand corner. Make sure its gold contact area is facing downwards and slide the SIM-card from left to right into the SIM-card slot.

#### This is how to install your battery

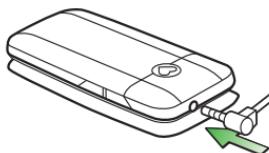

As the drawing shows, insert the battery by aligning the gold contacts in the phone and on the battery at the upper right.

Slide the cover back in the direction of the heart symbol until it clicks into place.

## 2.2 Charging your battery

**i** Before using your phone for the first time, make sure the battery has been charged for at least four hours. Failure to do this can result in a shorter battery lifetime.

Insert the charger cord into the jack at the top of the phone and then insert the plug of the charger cord into an electrical outlet.

### While charging

On the front of your closed phone you'll see a blinking red symbol of a battery, and on the narrow screen on the front a battery symbol that is slowly filling up will appear for approximately 10 seconds.

**i** At the beginning and end of charging a short melody plays. On the inside screen a battery symbol that is slowly filling up appears. When the level is low, the symbol is red; at mid-level it is yellow, at high green.

## **Charging completed**

A red battery symbol appears on the front of your closed phone and a full battery symbol appears on the inside screen. When your phone is fully charged, a melody sounds and you can disconnect the charger cord.

### **2.3 Turning on your phone; First use**

1. Open up your phone.
2. Press the  Key for at least two seconds.
3. You will feel the vibration signal, and for about 15 seconds you'll see the red emporia O on the screen.
4. Enter your 4-digit PIN-code and confirm it by pressing the  Key.  
You can note down your PIN-code here:
5. On the screen you'll see **emporia**.

### **Your telephone welcomes you!**

The first time you use your mobile phone you'll have to answer some questions. The phone needs this information for the navigation function and subsequent linkage to emporiaME.

You can also adjust the settings later under the menu option **6 Settings**, but we recommend you do this now.

### Language

1. **English** is back-lit in white.  
Press the Key to confirm it.
2. On the screen you'll see **Language "English" selected!**  
The melody confirming this will play.

### Time

1. Enter the current time by means of the key pad.  
Press the Key to confirm it.
2. On the screen you'll see **Time set!**.  
The melody confirming this will play.

### Date

1. Enter today's date by means of the key pad.  
Press the Key to confirm it.
2. On the screen you'll see **Date set!**.  
The melody confirming this will play.

## Name

1. Enter your first name by means of the key pad.
2. Store it by pressing the Key .
3. Enter your surname using the key pad.
4. Store it by pressing the Key .
5. On the screen you'll see **Your name has been saved.**  
The melody confirming this will play.

## At home

1. **Country** – Enter your country using the key pad.  
Press the  Key to confirm it.
2. **ZIP** – Enter the postal code of your town or city using the key pad. Press the  Key to confirm it.
3. **City** – Enter your town or city by means of the key pad.  
Press the  Key to confirm it.
4. **Street & Number** – Enter your address by means of the key pad. Press the  Key to confirm it.
5. On the screen you'll see **Your home is defined now!**.  
The melody confirming this will play.

## emporiaME

(see page 67)

To switch off your telephone, press the  Key again.

## 2.4 Information for Beginners

### The Menu

The menu is a list that lets you use your phone's functions and adjust the phone step by step to your specific needs.

By pressing the Keys  and  at the bottom of the screen you can make a selection in the menu or go back a step.

In addition the keys have these functions:

#### Key

With the  Key you can do the following:

1. End a call.
2. Go back a step in the menu.
3. Delete a letter when entering a text.

 *Should the phone not take you back to your desired menu option when you press the  Key, simply close and open the phone. The telephone will be back in standby mode and you can start again at the beginning.*

## Key

With the Key  you can do the following:

1. Make a call.
2. Take/Receive a call.
3. Confirm your selection in the menu.
4. Go to the Call List in standby mode.

On the screen you'll see the heading **Call info**.

## Selecting a menu option

With the  and  Keys you can make a selection, which is backlit in white.

You can also go to a menu option by using the number navigation.

Press the number on the key pad that is next to the desired function on the screen.

(Example: You are in the menu. Press the number  for  and you will go directly to the Phone book.)

## Energy-saving Mode / Standby Mode

If you've opened up your phone and don't press a key for a longer time, the screen will go black. This means that your phone is in its **energy-saving mode** to save electricity.

By pressing any key, you can turn the screen on again. Your phone is ready for you to use again – it's in the **standby mode**.

## **PIN-Code (Personal Identification Number)**

The 4-digit combination of numbers should protect your telephone against abuse. It's your secret number so that no stranger can switch on your phone.

**i** *When switching on your phone, you are required to enter your 4-digit PIN-code. You'll find your PIN-code in the information you got from your network operator.*

## **SIM-Card**

The SIM-card is a chip card that you insert into your telephone. Only then can you make a call with your mobile telephone.

(SIM stands for **Subscriber Identity Module**.)

## 2.5 Screen Symbols in Standby Mode

When your phone is in standby mode, the symbols on the screen mean as follows:

- Shows the battery level. 4 bars: Battery full
- Shows the reception quality. 4 bars: Optimal
- Shows the GPS is working.
- Shows the alarm is switched on.
- Shows the profile **Silent/Sleep mode** is on.
- Shows the profile **Meeting/Theatre mode** is on.
- Shows the profile **Maximum/Bus mode** is on.
- Shows a message has been received.
- Shows a call has been missed.
- Shows that Bluetooth is switched on.
- Shows that a Bluetooth device is paired.
- Shows that incoming calls have been diverted.
- Shows that data are just being transferred.

### 3 PHONE SETTINGS

#### 3.1 Switching on your phone

1. Open up your phone.
2. Press the  Key for at least two seconds.
3. You`ll feel the vibration signal. On the screen you`ll see the red **emporia O** for about 15 seconds.
4. Enter your 4-digit PIN-code.  
Confirm it by pressing the  Key.
5. The letters **emporia** appear one after the other on the screen.

#### 3.2 Switching off your phone

1. Press the  Key for at least two seconds.
2. The letters **emporia** disappear one after the other on the screen.
3. Your phone is off.

Last step: Close the phone.

## 4 CALLING

### 4.1 Making a call

1. Enter the number including the area code by means of the key pad.
2. Press the  Key to establish a connection.
3. On the screen you'll see Calling, the connection is being made.
4. Make your call.

### 4.2 Ending a call

1. Press the  Key to end a call.
2. On the screen you'll see **Call ended** and below it the length of time, for example **00:00**.
3. Or close your phone.

 *If the person you are talking with hangs up first, you needn't press any key.*

### 4.3 Answering a call

1. Your phone rings.
2. Press the  Key.
3. Talk on the phone.

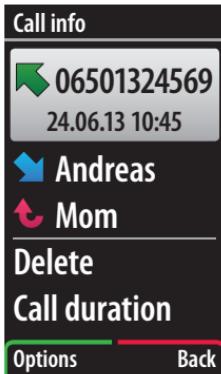

## 4.4 Redialling from your Call List

It's very easy to call a person again whom you've already called.

1. Press the  Key.
2. On the screen you'll see the people you've called recently.
3. Go to the name of the person you want to call by using the  or the  Key. Confirm your selection with the  Key.
4. The screen will say **Call**.
5. Make your call.

*People you have stored in your phone book appear on the screen by name. Only the others' phone numbers appear.*

## Display Symbols in the Call List

In the Call List the symbols on the screen mean the following:

-  Information about the dialled numbers.
-  Information about answered calls.
-  Information about missed calls.

## **4.5 Putting the ring-tone on mute for an incoming call**

1. Your phone rings.
2. You don't want to take the call and the ring-tone is unpleasant.
3. Press the  Key on the side of your phone.
4. The ring-tone is immediately silent.

## **4.6 Hands-free Talking**

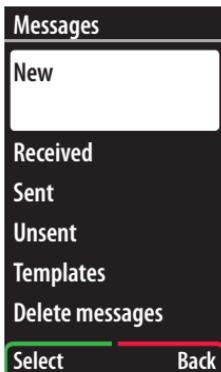

1. While talking, press the  Key.
2. **Speaker** is back-lit in white.
3. Confirm by pressing the  Key.
4. The screen will say **Speaker on**.
5. To end the hands-free mode, press the  Key again.  
The telephone switches over to the handset mode.

## 5 MESSAGES

You can write and send text messages with your phone. In this section you'll find out step-by-step how to do this.

You get to the menu option **Messages** in the following way:

1. Press the  Key.
2.  is highlighted. To confirm, press the  Key under **Select**.

**Nº** You get to this menu by pressing the  Key and than the  Key.

Available Menu Options:

**New, Received, Sent, Unsent, Templates, Delete messages, Send contact by SMS, SMS in PhoneBk, Message settings**

### 5.1 Writing Text Messages (SMS)

1. In the menu **Messages** select **New**. To confirm, press the  Key.
2. The screen will show a black field with the heading **Abc** and **160/1** on the right side.
3. Now you can write your text message (SMS).

## 5.2 Entering Texts

Using the key pad on your phone, you can enter letters, numbers and symbols. All letters, numbers from 0 to 9 as well as symbols (e.g. „?”, „€”) are stored on the keys. By pressing the keys a few times, you can access the desired characters.

### Letters on the individual keys

**0** **Space** (space between words) or **0**

**1** **1 . , ! ? 1 ' " @ :**

**2** **a b c 2 ä à å á á á æ ç á á á**

**3** **d e f 3 ð é ê € è ê ê ê**

**4** **g h i 4 î ï í ï ï ï ï ï ï**

**5** **j k l 5 £**

**6** **m n o 6 ö ñ ô æ ó ò**

**7** **p q r s 7 ß \$ §**

**8** **t u v 8 ü ù û ú ú**

**9** **w x y z 9 û ý ÿ**

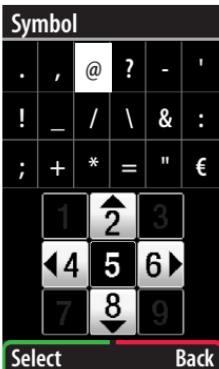

., @ ? - ' ! \_ / \ & : ; + \* = " € £ \$ ¥ % ( ) < >  
[ ] { } ^ ~ | ; # : ; : - : ( Ω § ☰

**Abc ABC abc 123.** Change from capitalized and lower case letters and numbers.

## Entering Special Characters

1. Press the  Key.
2. The screen will show the Special Symbols with the heading ***Symbol***.
3. To select the special symbols you can move the  Key up  
move the  Key to the left  
move the  Key to the right  
move the  Key down.
4. When you've selected the desired special symbol (back-lit in white), press the  Key to confirm.
5. The special symbol has now been ins

## Moving around in the Text

The blinking white line „|“ is called the “cursor”. It shows the current position on the screen where you can enter text.

Using the  or the  Key, you can move the position of the cursor in the text without changing any of the characters.

 When pressing the  or the  Key approximately two seconds, you can jump up or down in the text one line.

## Deleting Typing Errors

1. To delete individual characters to the left of the cursor, briefly press the  Key.
2. To delete the whole text, press the  Key for approximately three seconds.

## Entering Texts: an Example

To write the word **EMPORIA**, do the following:

Press the  Key twice. The **E** appears on the screen.

Press the  Key once. The **M** appears.

Press the  Key once. The **P** appears.

Press the  Key three times. The **O** appears.

Press the  Key three times. The **R** appears.

Press the  Key three times. The **I** appears.

Press the  Key once. The **A** appears

### 5.3 Sending Messages

You've written a text message (SMS) and want to send it. You have two options:

#### Sending Messages by entering a phone number

1. Under **Options** press the  Key.
2. **Send** is back-lit in white.  
To confirm, press the  Key.
3. The screen will say  
**Enter no.  or search no.**
4. Enter the number.  
To confirm, press the  Key.
5. The screen will show **Sent**.
6. The task is completed.

## Sending Messages with a Number from your Phone Book

1. Under **Options** press the  Key.
2. **Send** is back-lit in white.  
To confirm, press the  Key.
3. The screen will say  
**Enter no.  or search no.**
4. Under **Search** press the  Key.
5. You're now in the **Phone book**.  
The first entry in the phone book is back-lit white.
6. Using the  or the  Key, go to the desired entry.  
Under **Select** confirm your choice with the  Key.
7. The screen will show the number.  
To confirm, press the  Key under **Send**.
8. The screen will say **Sent**.
9. The task is completed.

**i** *If it takes longer to send the message, you'll see **Sending...** on your screen.*

**i** *You can store a message or send it at a later time. To do this, press  **Options** and select **Save as unsent**.*

**i** *You can store a message and use it as a template for future messages. To do this, press  **Options** and select **Save as template**.*

## 5.4 Receiving and Reading Messages

A message tone lets you know that you have received a new message. On the front of your closed telephone you will see a blinking white symbol of a letter, and the screen will say **1 New message!**

1. Press the  Key.
2. The screen will show the sender (name or number), date, time, and the contents of the message (SMS).
3. The task is completed.

## 5.5 Messages with Pictures (MMS)

With your phone you can send pictures that you have taken as a multi-media message (MMS). In this section we will find out how to do this step by step.

### Creating Multi-media Messages (MMS)

1. In the menu **Messages** select **New**.  
To confirm, press the  Key.
2. The screen will show a black field with the heading **Abc** and **160/1** on the right side.
3. Under **Options** press the  Key.
4. With the  or the  Key go to **Insert picture**.  
To confirm, press the  Key.
5. The screen will show the heading **Insert picture**.  
Select this using the  or  Key.  
**From photo album** is back-lit in white.  
To confirm, press the  Key.
6. **All my photos** is back-lit in white.  
To confirm, press the  Key under **Select**.
7. Select the photo using the  or  Key.  
To confirm, press the  Key.

8. The photo has been inserted into the text field.  
You can add a written message.  
Under **Options** press the  Key.
9. Send the message.  
(see page 33)

## 5.6 Unsent Messages

Messages that you did not want to send immediately and have stored you can find under **Unsent**.

**Nº** You can easily access **Unsent** by pressing  and then the number combination  .

## 5.7 Inserting Templates

Some **Templates** are already stored in your phone.  
You can add them to your text messages and adapt them.

**Nº** You can easily access **Templates** by pressing  and then the number combination  .

## 6 CAMERA

You can also take photos with your telephone. In this section you will find out step by step how to do this.

### 6.1 Taking Photos

1. Press the  Key at the side of your phone.
2. Point your screen at the object or person you would like to take a picture of.
3. To take the photo, press the  or  Key. You will hear the sound of the shutter.
4. The photo is automatically stored.
5. The task is completed.

Last step: Close your phone.

## 6.2 Camera Options

You can set a few things in your camera. To do this, press the

 Key under **Options** and select the desired settings:

- **Auto timer** – Select the delayed-shutter release for self-portraits.

Select the  or  Key for **10, 20 or 30 seconds**.

To confirm, press the  Key.

- **Effect** – Select special effects for future photos.

Select among **Normal, Black & White, Negative** or **Sepia** by pressing the  or  Key.

To confirm, press the  Key.

- **Brightness** – Makes it possible to adjust the brightness of the photo: **Dark, Normal or Light**.

- **Size** – Determines the size or the exact details of future photos.

Choose among **2.0 MP, 1.2 MP, XVGA** (1.0 MP), **VGA** (0.3 MP)

or **MMS** by pressing the  or  Key.

To confirm press the  Key.

 For photos you want to store in the telephone book, select **XVGA**. For photos you want to print, select **2.0 MP**.

- **Quality** – Select the quality and/or the details of future photos.

Select among **High**, **Medium** or **Low** using the or Key.  
To confirm, press the Key.

- **Night Mode** – Optimally sets the camera for night photos.  
Select between **On** and **Off** by pressing the or Key.  
To confirm, press the Key.

### 6.3 Viewing Photos

1. Press the Key.
2. Go to **All my photos** by pressing the or Key.  
You will see all the photos you have taken with your mobile phone.  
The last photo you took is first.  
All of the photos are numbered.
3. Choose a photo by pressing the or Key.  
Press the key **Select**.
4. The photo will appear on the screen.
5. To view other photos, press the or Key.

## 6.4 Making Use of Your Photos

You can use a stored photo in the following way:

To do this, choose the desired options under **Options** by pressing the  Key:

- **Send** – You can send the photo directly as a multi-media message. (see page 36)
- **Delete** – You can delete the photo
- **Add to favourites** – You can mark the photo as your favourite. In the future you will simply find it under Favourites.
- **Use as wallpaper** – Determines the photo you will see when you turn on your phone.
- **Mark for printing** – Mark the photo to be printed at a later time.
- **Contact's picture** - Add a photo to a contact in your telephone book. When you talk on the phone with this person, the photo will appear on the screen.

# Picture sharing.

Share the special moments with emporiaME.

Receive pictures from children and grandchildren.  
Make a call and view the pictures together.

## 7 PHONE BOOK

In the telephone book you can store up to 500 entries. This means when you have entered the names and numbers of your contacts (family, friends, doctor, etc.) in your telephone, you will always have your personal telephone book with you.

You get to the menu option **Phone book** in the following way:

1. Press the **menu** Key.
2. Select the **Phone book**  with the **–** or **–** Key.  
To confirm, press the **[L]** Key.

**Nº** You can access this menu by pressing the **menu** Key and then the **2 abc** Key.

### Available Menu Options:

**Search name, Add contact, Edit contact, Delete contact, Send contact by SMS, Copy contact, Own number, Quick dial keys, Emergency numbers, Settings, SMS in PhoneBk**

## 7.1 Storing Numbers and Names

**Nº** You can easily access the **Phone book** by pressing the **menu** Key and then the number combination **2 abc** **2 abc**.

1. In the **Phone book** menu select **Add contact**.  
To confirm press the **L** Key.
2. On the screen you will see **Enter name:**   
Enter the name using the key pad.  
**Save** the name by pressing the **L** Key.
3. On the screen you will see **Enter number:**   
Enter the number including the area code.  
**Save** this by pressing the **L** Key.

### Add Birthday Reminder:

4. On the screen you will see:  
**Do you want to add a birthday reminder for ... ?**  
Select **Yes** with the **L** Key or **No** with the **R** Key.
  - If you have selected **Yes**,  
enter the birthday using the key pad.
  - Press the **L** Key for **Continue**.
  - On the screen you will see, e.g., **01.01.2000: You will get a reminder 3 days before and on the birthday.**
5. Press the **L** Key for **OK** or  
press the **R** Key for **Edit** if you want to correct anything.

### **Add Contact Photo:**

6. On the screen you will see:

***Do you want to add a contact photo for...?***

Select **Yes** with the  Key or **No** with the  Key.

- If you want to add a photo:

By pressing the  or  Key go to ***Take new photo*** or ***From photo album*** and confirm this with the  Key.

- If you want to take a new photo,  
then select ***Take new photo***.

Save and send birthdays, meetings and doctor's appointments with emporiaME.

## 9 CALL INFO

Here you find an overview of all the telephone connections.

You get to the menu option **Call info** in the following way:

1. Press the  Key.
2. Select **Call info**  with the  or  Key.  
To confirm, press the  Key.

**Nº** You can access this menu by pressing the  Key and then the  Key.

Available Menu Options::

**Missed calls, Dialled numbers, Received calls,**  
**Call duration, Delete**

### 9.1 Missed calls

Here you find all the calls that you did not answer. If you have missed a call, it is shown on the standby screen with .

1. Select **Missed calls** in the menu **Call info**.  
Confirm with the  Key.
2. The last 20 missed calls are shown.  
Confirm the list and  on the screen disappears.

3. The task is completed.

**Nº** You can easily access this feature by pressing **menu** and then the number combination **4**<sub>ghi</sub> **1**<sub>abd</sub>.

## 9.2 Dialled numbers

Here you find the last numbers you dialled.

## 9.3 Received calls

Here you find the last numbers you answered.

## 9.4 Call duration

For a better overview of your telephone conversations you find here a list of the calls you last made and their length.

## 9.5 Delete

Deletes All Call Lists (all, missed, dialled and answered).

## 10 TOOLS

Here you find a number of useful helpers and some diversions.

**You get to the menu option *Tools* in the following way:**

1. Press the **menu** Key.
2. Select **Tools**  with the **▲** or **▼** Key.  
To confirm, press the **l** Key.

**Nº** You can access this menu by pressing the **menu** Key and then the **5<sub>jkl</sub>** Key.

**Available Menu Options:**

***emporiaME, Games, Weather, Orientation, Calculator, Magnifier, Emergency button, Position, Bluetooth***

## 10.1 emporiaME

 *emporiaMe is a bridge between generations. It makes interaction between Smartphone-Apps and emporia mobile phones possible, e.g., mutually shared photo albums, shared calendars or the remote maintenance options. This way, the digital possibilities are reduced to the most important thing: simple communication with your loved ones.*

Here you find out how to access emporiaMe:

1. Select **emporiaMe** in the menu **Tools**.  
To confirm, press the  Key.
2. **New account** is back-lit in white.  
To confirm, press the  Key.
3. On the screen you will see:

**Do you want to activate emporiaME service now?**

Confirm **Yes** with the  Key.

4. Please accept the licensing contracts by pressing the  Key.
5. On the screen you will see:  
**Enter telephone number**   
Enter your telephone number.  
To confirm, press the  Key.
6. Your account is set up now.
7. Select **Friends** by pressing the  or  Key.  
To confirm, press the  Key.

8. Select **New friend** by pressing the  or  Key.  
To confirm, press the  Key.  
The phone book is displayed.
9. Select a contact with the  or  Key.  
To confirm, press the  Key.  
Your phone will send a »Friend Me« request to your friend's smartphone. They have to confirm the contact. As soon as they have done this, you will receive a confirmation on your emporia mobile phone.  
You can now decide what degree of access this friend should have. Confirm if they can remotely maintain your Phone book and calendar.

 *emporiamE only works with friends who use a smartphone and have already installed the emporiamE App.*

 *The license agreement can be found at:  
[www.emporia.eu/termsandconditions/emporiamE](http://www.emporia.eu/termsandconditions/emporiamE)*

## 10.2 Games

This telephone offers you 3 games to train your memory.

They train your powers of concentration, your ability to react, and your visual orientation.

1. Select **Games** in the menu **Tools**.

To confirm, press the  Key.

2. Select a game with the  or  Key.

To confirm, press the  Key.

3. The game opens up.

- Press the  Key **Help**.

The screen will show a short description of the game.

- Press the  Key **Back**.

You can continue/begin the game.

- If you want to stop playing before the end of the game, press the  Key **Back** or close your telephone.

**Nº** You can easily access this feature by pressing  and then the number combination   .

### Quadis

In this game you have to find the right end of the way that is shown as fast as possible. Quadis trains your visual orientation and ability to concentrate.

## PickQuick

PickQuick requires an ability to react quickly. You have to react correctly to different stimuli. You only have a short time to think. This game trains your resilience.

## Jappo

Jappo trains your powers of concentration and attentiveness. You have to quickly check if a certain symbol is present in a group of symbols.

### 10.3 Weather

Your telephone can show the current weather at your location and the forecast for the coming days.

**Nº** You can easily access this feature by pressing **menu** and then the number combination **5<sub>jkl</sub> 3<sub>def</sub>**.

1. Select **Weather** in the menu Tools.  
To confirm, press the **L** Key.
2. The current weather as well as a four-day forecast will appear on your screen.
3. Press the **L** Key **Options**.  
You can **Update current location**, **Change location**,

### ***Add location, Remove location or Setting.***

#### **Show weather forecast on start-up screen**

4. Choose **Settings** with the  or  Key.  
To confirm, press the  Key.
5. Select **Show at start** by pressing the  or  Key.  
To confirm, press the  Key.  
You will see the current weather and  
a weather forecast right on your start-up screen.
6. Press the  Key **Back** or  
close your telephone to end the forecast.

## 10.4 Orientation

The telephone shows you the fastest way home or to interesting places.

1. Select **Orientation** in the menu **Tools**.  
To confirm, press the  Key.
2. Select with the  or  Key among the following:
  - **My position** – Here you see the address of your current location. Below the address you will see the exact coordinates of where you are.
  - **Bring me home** – Here your mobile phone calculates the fastest way from your current position to your **Home** location. Your phone guides you there using arrows.
  - **Points of interest** – Here you can have the fastest way to pre-determined places like cafes, chemists', the police, or hospitals calculated. Select a location using the  or  Key and confirm it with the  Key. Your mobile phone calculates the fastest route there from your current position and guides you there using arrows.
  - **Home setup** – Here you can set the location for **Home**. When you are at home and want to set the location with the

help of the GPS, select **Actual position**.

Or select **Enter address** to enter your address manually.

- **Settings** – Here you can choose between kilometres and miles and set the maximum distance within which you want to find interesting locations.

## 10.5 Calculator

This menu option helps you to do simple calculations.

**Nº** You can easily access this feature by pressing **menu** and then the number combination **5<sub>jkl</sub> 5<sub>jkl</sub>**.

## 10.6 Magnifier

You can use the camera in the telephone as a magnifying glass.

1. Select **Magnifier** in the menu **Tools**.  
To confirm, press the  Key.
2. Now the magnifying glass is working.  
Hold the camera about 5 cm above the object that you want to see magnified.
3. Press the  Key for **Back** or close the telephone to end magnifying.

**Nº** You can easily access this feature by pressing  and then the number combination  .

## 10.7 Emergency button

- Emergency button **OFF**: No emergency number will be dialled in case the key is pressed.
- Emergency button **ON** and no emergency number is stored: When the key is pressed, the emergency number 112 will automatically be dialled. Using the **Settings** in your **Phone book**, you can store up to 5 emergency numbers.  
(see page 87)

## 10.8 Position

Here you can determine your current location. This is necessary for the navigation feature, the weather, and in an emergency.

1. Select **Position** in the menu **Tools**.  
To confirm, press the  Key.
2. Select with the  or  Key **Position On/Off**.  
To confirm, press the  Key.
3. Select with the  or  Key **On** or **Off**.
4. On the screen you will see  **Done**.

 You can get further information about determining your location on our website: [www.emporia.eu](http://www.emporia.eu)

## 10.9 Bluetooth

Bluetooth is a wireless connection between electronic devices. You can connect your telephone with, e.g. the hands-free system on your car or a Bluetooth headset.

1. Select **Bluetooth** in the menu **Tools**.  
To confirm, press the  Key.
2. Select **Bluetooth On/Off** using the  or  Key.  
Press the  Key for **Select**.
3. Select **On** or **Off** with the  or  Key.  
To confirm, press the  Key.
4. On the screen you will see:  
 **Bluetooth is now switched on**

### Connecting Bluetooth:

1. Select **Bluetooth** in the menu **Tools**.  
To confirm, press the  Key.
2. Select **Connect** with the  or  Key.  
Press the  Key for **Select**.
3. Select **Search for new devices** with the  Key.  
Your phone looks for devices to connect with in the surroundings.

## Managing Devices

1. Select **Bluetooth** in the menu **Tools**.

To confirm, press the  Key.

2. Select **Manage devices** with the  or  Key.

Press the  Key for **Select**.

3. Choose among **Visibility**, **Device name**,

and **Use default PIN**.

Press the  Key for **Select**.

- **Visibility** (Pre-setting: On)

You can hide your phone from other Bluetooth devices.

- **Device name** (Pre-setting: EMPORIA)

Here you determine the name with which other Bluetooth devices can find your telephone.

- **Use default PIN** (Pre-setting: On)

When a new Bluetooth device is connected, the PINs 0000 and 1234 automatically used.

In case the PINs are incorrect, you have to enter them manually.

## 11 SETTINGS

Here you can set up your telephone according to your personal preferences.

You get to the menu option **Settings** in the following way:

1. Press the **menu** Key.
2. Select **Settings**  with the **↖** or **↙** Key.  
To confirm, press the **l** Key.

**Nº** You can access this menu by pressing the **menu** Key and then the **6<sub>mn</sub>** Key.

Available Menu Options:

**Silent/Sleep mode, Sound & alert, Display & light, Language, Time & date, Favourite key, Camera settings, Call waiting, Call forward, Auto Pickup, Withhold number, Help Text, Network, Internet settings, Mailbox number, Security, Emergency numbers, Emergency button, Master reset**

## 11.1 Silent/Sleep mode

Activate this feature when you do not want to switch off your phone, but it should not ring, e.g., at the doctor's surgery or in church. The calls will be shown on the screen but the phone will not ring.

**Nº** You can easily access this feature by pressing **menu** Key and then the number combination **6 <sub>mnd</sub> 1 <sub>oo</sub>**.

## 11.2 Sound & alert

Here you can choose a ring tone melody and determine its volume, vibration signal, key tones, etc.

**Nº** You can easily access this feature by pressing **menu** Key and then the number combination **6 <sub>mnd</sub> 2 <sub>abc</sub>**.

## 11.3 Display & light

Here you can set how long the screen and the keypad are lit before the telephone goes into the energy saving mode.

### Keypad light

 *If the keypad is lit longer, it requires more energy, reducing the operation time of your phone.*

### Text size

Here you can adjust the size of the texts on the screen to your needs.

### SMS Text size

Here you can determine the size of the letters for text messages.

## 11.4 Language

Here you can choose among different languages. Should you set the wrong language by mistake, you can reset it to English here.

**Nº** You can easily access this feature by pressing **menu** Key and then the number combination **6 <sub>mnd</sub>** **4 <sub>ghi</sub>**.

## 11.5 Time & date

Here you can set the time and date. This is where you have to, e.g., change the clock to daylight savings time.

## 11.6 Favourite key

Using the **☆** Key you can store either your favourite telephone contact or the feature that you use the most. Here you can choose or change a feature for this.

## **11.7 Camera settings**

Here you can set the camera just the way you want it, e.g., resolution or special effects. (see page 39)

## **11.8 Call waiting**

Here you can set a signal that will notify you of an incoming call while you are already making a call.

## **11.9 Call forward**

Here you can divert a call to your answering machine or to a certain person in your Phone book.

## **11.10 Auto Pickup**

Here you can set the automatic call answering feature. An incoming call will be answered immediately when you open up your phone.

## 11.11 Withhold number

This feature allows you to decide if your own telephone number will be shown on the display of the phone of the person you are calling.

## 11.12 Help Text

For the individual menu option there is helpful information that explains the exact way each option works. Here you can switch these texts on and off and set the time after which the text will appear.

 When some information appears on the screen, you can use the  Key in the text to scroll down or the  Key to close the text.

## 11.13 Mailbox number (Answering Machine)

Here you can store the number of the answering machine. You will get this number from your provider.

1. Select **Mailbox number** in the menu **Settings**.

To confirm, press the  Key.

2. On the screen you will see:

**Mailbox no.** 

Enter the number of your Mobilbox.

You will find the number in the paperwork that your provider gave you.

To confirm, press the  Key.

3. On the screen you will see:

**Number saved. Listen to mailbox: Press button "1" 2 sec.**

4. The task is completed.

**Nº** If you press  key in standby mode for at least three seconds, you will automatically be connected to your answering machine.

## 11.14 Security

Here you can change your PIN-Code or switch it off. If you switch off your PIN-Code, then your device will no longer be protected from someone else's using it.

5. Select **Security** in the menu **Settings**.  
Confirm this by pressing the  Key.
6. **PIN** is back-lit in white. Confirm this by pressing the  Key.  
Select among **PIN on**, **PIN off**, or **Change PIN**.  
by pressing the  or  Key.  
To confirm, press the  Key.
7. Enter your current PIN-Code. (see page 18)  
To confirm, press the  Key.
8. On the screen you will see: **PIN OK! PIN Request...**
9. The task is completed.

## 11.15 Master reset

This feature returns your phone to its factory settings.  
To do this, you need the telephone code, which is 1234.

## 12 EMERGENCY CALL FEATURE

Your telephone has an emergency call function that calls help quickly if you need it. In this section you will find out step by step how it works. For your own safety please read through the whole chapter carefully.

### 12.1 Switching On the Emergency button

1. Press the  Key.
2. Select **Settings**  by pressing the  or  Key.  
Confirm this by pressing the  Key.
3. Select **Emergency** button by pressing the  or  Key.  
To confirm, press the  Key.
4. Go to **On** by pressing the  or  Key.  
Confirm this by pressing the  Key.
5. On the screen you will see:

#### **Emergency button Activated**

The task is completed.

Last step: Close your phone.

## 12.2 Storing Emergency numbers

It's possible to store five numbers as emergency numbers.

You can store individuals' numbers and those of emergency rescue services.

If possible, individuals' numbers should be stored first and then those of the rescue services.

**i** *It is only possible to use numbers as emergency numbers that are already stored in your phone book. (see page 45)*

### Storing Individuals` Numbers as Emergency Numbers

1. Press the  Key.
2. Select **Settings**  by pressing the  or  Key.  
Confirm this by pressing the  Key.
3. Select **Emergency numbers** by pressing the  or  Key.  
Confirm by pressing the  Key.
4. **Add Emerg. No.** is back-lit in white.  
To confirm, press the  Key.
5. **EmNo. 1** is back-lit in white.  
Confirm this by pressing the  Key.
6. Select your desired contact from your phone book by pressing the  or  Key.  
Confirm this by pressing the  Key.
7. **Privat** is back-lit in white.  
Confirm this by pressing the  Key.

8. The heading **Send Message** will appear.

**Yes** is back-lit in white.

Confirm by pressing the  Key.

9. On the screen you will see:  **Saved**
10. Go on storing more individuals` numbers as emergency numbers just as you did the first emergency number.  
You can store a maximum of five emergency call numbers.
11. The task is completed.

Last step: Close your phone.

### **Storing Emergency Rescue Services as Emergency Numbers**

 *If you want to store the number for the ambulance, police, fire brigade, or other public institution or rescue service as an emergency number, you first have to contact them. Be careful! You have to store the desired institution or service in your Phone book!*

 *We cannot accept any responsibility or liability in the event that you, for instance, call a rescue service by mistake.*

## 12.3 Starting the Emergency Call Function

1. Press the Emergency Call Button  on the back of your telephone for at least three seconds.
2. The emergency call cycle is started. A shrill, piercing warning tone sounds immediately to alert the people around you.

 *If you have pressed the emergency call button by mistake, immediately press the  Key for three seconds to cancel it.*

 *If no emergency number is stored or there's no credit left on your phone card, the European emergency call number 112 will be dialled. This means that your call will be forwarded directly to the next police station.*

3. The telephone automatically calls the emergency number that is stored first and also sends it a text message (SMS). The text message (SMS) notifies the person about the emergency call.

 *For an emergency call, your number will always be displayed, even if you selected **Withhold number** under **Settings**.*

4. For the emergency call the telephone automatically switches on the handsfree speech function at the highest volume.

5. As soon as the person you called receives the emergency call, they are asked to confirm by pressing three times **0**.

**i** *In the case of an emergency rescue service or institution, no confirmation is necessary.*

6. Should the first person not confirm, the emergency call numbers that are stored next in that order will be called.
7. Only when a person answers and confirms or a rescue service was called is the emergency call cycle stopped. The other emergency call numbers stored in your phone book will no longer be called.

**i** *The emergency call cycle includes up to three rounds of dialling of all the stored emergency call numbers.*

## **12.4 Additional Information about the Emergency Call Function**

- If you are called within the first hour after the emergency call function has been activated, the telephone automatically accepts every incoming call.
- In order to end this automatic answer function, you have to switch off your telephone and then switch it on again. (see page 25).

## 13 SAFETY HINTS

-  Small phone parts can cause choking if swallowed.
-  This device can produce loud tones.
-  Do not dispose of by burning.
-  Avoid contact with magnetic fields.
-  Avoid exposing the device to extreme temperatures.
-  Avoid contact with liquids, keep the device dry.
-  Do not dismantle the device.
-  In an emergency do not only rely on this device.
-  Use approved accessories only.

### Handling the Battery & Safety

Always switch off the device and disconnect the battery charger before you remove the battery. Only use the battery and the charger for your device that are supplied by the manufacturer or spare parts approved by the manufacturer. Using other batteries and chargers can be dangerous. Don't take the battery apart and don't cause a short circuit. If the battery poles touch a metal object by mistake, e.g., a key, a paper clip or a pen, a short circuit can result. The improper use of the battery can damage the device and be hazardous to your health due to fire, explosion, or chemical burns. If you think that the battery is damaged, stop using it and have it checked at your service center.

## **Handling the Product**

You are solely responsible for the use of the device and for any consequences of its use. The device must be switched off wherever the use of a mobile telephone is prohibited. The use of the device is subject to safety measures that were developed for the protection of the user and their surroundings.

- Always use the device carefully and keep it in a clean and dust-free place.
- Don't expose the device to an open flame or burning tobacco products.
- Don't expose the device to liquids or dampness.
- Don't drop the device, throw it, or try to bend it.
- Don't use aggressive chemicals, detergents, or aerosols to clean the device.
- Don't paint the device.
- Don't dismantle the device. Only let authorized personnel take it apart.
- Don't expose your device to extreme temperatures below 0° and above 40° Centigrade.
- Follow your local regulations concerning the disposal of electronic devices.
- Don't carry the device in the back pocket of your trousers, because it can break when you sit down.

## **Electricity Supply**

Only put the battery into the device and start using the device when the instruction manual says to do so. The power plug is only suitable for use in conventional electrical outlets of the public mains supplying 230 voltage / 50 Hz (10/16A).

## 14 DISPOSAL

- **Disposing of the packaging**

The box and other packaging materials are recyclable and should, in principle, be brought to a recycling centre.

- **Disposing of the battery**

Batteries do not belong in with household rubbish!

As a consumer you have a legal obligation to return used batteries. You can give them back at your local collection centre or retail store.

- **Disposing of the device**

When the day comes that your device is worn out, please don't throw it in with your household rubbish.

For the sake of the environment, take it to a materials recycling centre, where old devices can be left and sent off to be used in an environmentally compatible way.

## 15 WARRANTY

The 24-month warranty (6 months for the battery) begins with the sale of the device to the user. Be sure to keep the **original sales receipt** (cash register slip, invoice) with the **IMEI-number** to prove the date of sale. Our warranty is determined by the conditions of warranty that were valid at the time of purchase. To the greatest possible extent that is legally valid, emporia is in no way to be held responsible for the following situations:

- Any loss of data or income.
- Any special or incidental damage as well as indirect or consequential damage, regardless of the cause.

## 16 TECHNICAL PRODUCT DATA

- Loudspeakers are suitable for the hearing impaired
- Dual band GSM 900 / 1800 MHz
- Measurements: 108 x 53 x 20 mm
- Weight: 110 gr
- Screen size: 2.8" FSTN
- Screen resolution: 240 x 400 pixels
- Operating temperature: 0 - 40° C
- Battery: AK-V88 – Li-Ion 3.7V / 1150 mAh
- Standby time: up to 170 hours
- Talk time: up to 6 hours
- Internal antenna: SAR 1.6 W/kg
- Power supply: RL-V170EU (In: 100 - 240V, AC 50/60Hz | Out: 5,0 V - 550 mA DC)
- 2 MP Digital camera
- Bluetooth 2.1 HFP, HSP
- Torch: protection class 3

## 17 EU DECLARATION OF CONFORMITY (DOC)

We, Emporia Telecom Produktions- und Vertriebs-GmbH & Co. KG,  
hereby declare that the design of the device referred to below complies  
with the pertinent EU-Directives.

**Name of Product:** GSM 3G/2G Dual Band Mobile Phone

**Product Number:** V88

**Pertinent EU-Directives:** Radio Equipment 1999/5/EG R & TTE Directive 1999/5/EC

**Harmonised EN Standards, specific and basic standards:**

- **Safety and Health:** EN 60950-1:2006+A12:2011; EN 50360:2001;  
EN 62209-1-2006; EN 62209-2-2010; EN 62479:2010
- **EMC:** EN 301 489-1 V1.9.2; EN 301 489-3 V1.4.1; EN 301 489-7 V1.3.1;  
EN 301 489-17 V2.1.1; EN 301 489-24 V1.5.1
- **Radio spectrum:** EN 300 440-1 V1.6.1; EN 300 440-2 V1.4.1;  
EN 300 328 V1.7.1; EN 301 511 V9.0.2; EN 301 908-1 V5.2.1; EN 301 908-2 V5.2.1
